Product Qualification Operations Bulletin

No. 22 • September 2020

Products qualified by GlobalPlatform for GSMA programs

1.1 About this bulletin

The Product Qualification Operations Bulletin aims to present the GlobalPlatform Product Qualification Process changes and updates.

When an effective date is mentioned for a change, the change must be implemented as of that date; Changes for which no effective date is specified in the article are effective immediately.

1.2 Summary

Article Summary:	The following official Bulletin provides details on how to proceed for product qualification against both GSMA and GlobalPlatform specifications
Type:	Operation Requirement Update
Effective Date:	Applicable immediately
Applicability:	Concerned configurations listed below

1.3 Concerned Configurations

Products based on GSMA test specifications have a qualification validity period of 10 years while products following GlobalPlatform configurations have a validity period of 3 years.

Consequently, when a product is submitted for qualification against both GSMA and GlobalPlatform specifications (e.g. SE configuration and eUICC Consumer), 2 separate LOQ shall be issued. (a 3-year LOQ and a 10-year LOQ).

To date, the test suites based on GSMA test specifications are:

- **eUICC M2M** and
- **eUICC Consumer.**

1.4   Impact on Product vendors

Product vendors submitting product for qualification against both GSMA and GlobalPlatform specifications shall perform 2 separate qualifications and shall provide:

- 2 QLA (Exhibit A)
- 2 SCO
- 2 test reports.

Note that qualification fees shall apply for each qualification.
