Product Qualification Operations Bulletin

No. 3 • 3 March 2014

SCO Update (v2.0) related to UICC Memory Management extension and UICC SCP81 extension Test Suites activation.

1.1 About this bulletin

The Product Qualification Operations Bulletin aims to present the GlobalPlatform Product Qualification Process changes and updates.

When an effective date is mentioned for a change, the change must be implemented as of that date; Changes for which no effective date is specified in the article are effective immediately.

1.2 Summary

Article Summary:	This article describes the update of the card SCO related to new test suites activation.
Type:	Operation Requirement Update
Effective Date:	Applicable immediately
Applicability:	UICC Configuration

1.3 Test Suites activation

As of 3rd March 2014, the new test suites:

- UICC Memory Management extension Test Suite v1.0.0 and
- UICC SCP81 extension Test Suite v1.8.0.1

Have been activated, therefore, card products that comply with these configurations can be submitted for Global Platform qualification.

1.4 Impact on the SCO

Consequently, the card product SCO has been updated to enable these configurations to be submitted for qualification as follows:

- A.2.1.2 – The UICC Configuration is submitted with the Memory Management extension, version 1.0

- A.2.1.3 – The UICC Configuration is submitted with the SCP81 extension, Amendment B, version 1.1.1
