Product Qualification Operations Bulletin

No. 4 • July 2014

SWP/HCI Product Qualification – Tests to be run

1.1 About this bulletin

The Product Qualification Operations Bulletin aims to present the GlobalPlatform Product Qualification Process changes and updates.

When an effective date is mentioned for a change, the change must be implemented as of that date; Changes for which no effective date is specified in the article are effective immediately.

1.2 Summary

<table>
<thead>
<tr>
<th>Article Summary:</th>
<th>This article describes the tests to be run when a GP product is submitted to be tested using SWP and HCI Test suite.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type:</td>
<td>Operation Requirement Update</td>
</tr>
<tr>
<td>Effective Date:</td>
<td>Applicable immediately</td>
</tr>
<tr>
<td>Applicability:</td>
<td>SWP/HCI</td>
</tr>
</tbody>
</table>

1.3 Tests to be run

In order to qualify Products using the SWP/HCI Test Suite, It is requested to run the tests under 5 different environments instead of the 9 induce from the specifications.

- 3 Test runs for all variations (default, minimum, maximum) of voltages class B and C at ambient temperature,
- 1 Test run on default level at Minimum ambient temperature,
- 1 Test run on default level at Maximum ambient temperature.

(Note that 1 test run encompasses: class B + Class C low power + Class C full power).
