Product Qualification Operations Bulletin

No. 9 • July 2015

Change & Derivative Product Qualification Regression Tests to be run

1.1   About this bulletin

The Product Qualification Operations Bulletin aims to present the GlobalPlatform Product Qualification Process changes and updates.

When an effective date is mentioned for a change, the change must be implemented as of that date; Changes for which no effective date is specified in the article are effective immediately.

1.2   Summary

Article Summary:	This article describes the tests to be run when a GP product is submitted to be tested as a change or a derivative product.
Type:	Operation Requirement Update
Effective Date:	Applicable immediately
Applicability:	All Configurations

1.3   Regression Tests to be run

In order to reduce the time and cost of a Change or a Derivative Product Qualification, It is requested to run the following tests:

Regression Testing

Change Description / Package to be run	All Packages of the Configuration Testsuite	CCCM	SWP/HCI
1) Change of a product that follows 'Derivative Product' definition 2) Derivative product such as: New Chip Platform Contacltess application activation Contact application activation New protocol supported JAVA code moved from EEPROM to ROM New Antenna Other cases of derivative product …	Secured / Non Desctructive Tests only	• cccm_OPR_scenario1_NON_PKI • cccm_OPR_scenario1_PKI • cccm_OPR_scenario2A • cccm_OPR_scenario2B	**SWP:** All tests of the package (Ambient Température & Défaut voltage) **HCI:** All tests of the package (Ambient Température & Class CFull)
