

eUICC Consumer: SGP.22 v3.x Qualification Operations Bulletin

No. 33 • April 2023

eUICC Consumer: SGP.22 v3.x qualification

1.1 About this bulletin

The Product Qualification Operations Bulletin aims to present the GlobalPlatform eUICC Consumer Qualification Process updates.

When an effective date is mentioned for a change, the change must be implemented as of that date; Changes for which no effective date is specified in the article are effective immediately.

1.1 Summary

Article Summary:	The following official Type Approval Bulletin describes the way to qualify eUICC Consumer products supporting a version 3.x of SGP.22
Type:	Operation Requirement Update
Effective Date:	Applicable immediately

1.2 Products supporting SGP.22 v3.0

At the time of writing of this document, the GSMA SGP.23-1 eSIM Test Specification version 3.0 aiming to test a product implementing SGP.22 version 3.0 is about to be published.

Following the information given by GSMA, a version 3.1 of both SGP.22 and SGP.23-1 specifications should be available in Q3 2023. These two specifications will contain significant evolutions and improvements.

As a consequence, it has been asked to GlobalPlatform to only consider these future releases of the eUICC Consumer specifications in the SE Compliance Program. Hence, GlobalPlatform will not authorize the certification of products supporting SGP.22 v3.0.

1.1 Products supporting an SGP.22 version higher than 3.0

In accordance with the GSMA recommendations, GlobalPlatform will work on a Test Suite allowing to certify eUICC products supporting SGP.22 version 3.1, by taking into account the relevant SGP.23-1 test specification.

This Test Suite will evolve by taking into account future versions of SGP.22 and the advices of GSMA.

1.2 Impact on the Trusted Connectivity Alliance Test Suite

The Interoperable Profile Package Test Suite will follow the evolutions of the TCA technical and test specifications, and will only consider products supporting SGP.22 v3.1 or later.
