Product Qualification Operations Bulletin

No. 34 • May 2023

Test Suite Activation schedule

1.1   About this bulletin

The Product Qualification Operations Bulletin aims to present the GlobalPlatform Product Qualification Process changes and updates.

When an effective date is mentioned for a change, the change must be implemented as of that date; Changes for which no effective date is specified in the article are effective immediately.

1.2   Summary

Article Summary:	The following official Type Approval Bulletin announcing the activation of Test Suite
Type:	Operation Requirement Update
Effective Date:	As per the date indicated below
Applicability:	Concerned Test Suite is listed below

Following the TestFest that took place from the 19th to the 21st of April 2023, the following new Test Suite has been released:

- APDU Transport over SPI / I2C v1.0 - Compliance Test Suite v1.4.1

1.3   Test Suite activation

The Test Suite above will be active in the laboratories from **1th of June 2023**.

1.4   Test Suite usage

This Test Suite aims to verify the compliance of Secure Element products against the SPI or the I2C protocol. One card options XML file shall be provided by the SE manufacturer for each tested protocol. The GlobalPlatform Supported Configuration Options (SCO) for SE products version 5.2 has been updated accordingly.

Test tools have been qualified with their respective reader(s) / adaptor(s). It is under the responsibility of the Labs to choose one of these supported hardware during a product qualification.
