

SESIP Bulletin

No. 1 • January 2024

Transition period

1.1 About this bulletin

This SESIP Bulletin clarifies the rules about the migration to the new version of SESIP.

When an effective date is mentioned for a change, the change must be implemented as of that date. Changes for which no effective date is specified are effective immediately.

1.2 Summary

Article Summary:	Activation of new version of SESIP
Type:	Certification Requirement Update
Effective Date:	As per the date indicated
Applicability:	All SESIP Schemes

1.3 Cryptographic Recommendations

In Nov 2023, GlobalPlatform's Security Evaluation Standard v1.2 for IoT Platforms (SESIP) methodology has been adopted by the European Standards Organizations, CEN and CENELEC.

By selecting v1.2 of the SESIP methodology (GP_FST_070, July 2023), developers will therefore automatically get their products compliant with a European Standard (EN 17927).

Regarding on going or future SESIP evaluations, a transition period has been defined: v1.2 can be considered from Feb 1st, 2024, and shall be mandatory used for all evaluations submitted after July 1st 2024.
